About

I'm a person who does not accept failure from a lack of knowledge. Because of this I strive to always learn more about what I'm currently pursuing.

Add to this a desire to always keep things moving and you get a person who works fast and efficiently without compromising quality.

In daily life I do a lot of cooking and food exploring, then I enjoy going to the gym to offset it all.

Work Experience

Present

Lead Systems Developer - Fullstack Swegon, Gothenburg

Jun 2021 - Present
- Lead developer for Swegons brand new "Wise" HVAC systems designer (Blazor, .Net).
- Coordinated implementation and development across different teams.
